EDUCATION

SRM University

Master's in Computer Application

Jun 2024 - May 2026

SRM University

Bachelor of Science in Computer Science

Jun 2021 - May 2024

EXPERIENCE

Vimovi Global Tech Pvt Ltd. | Mobile App Developer - Full Time

Nov 2025 – March 2026

- Promoted from intern to full-time within 3 months — sole React Native developer on Vimovi's flagship SaaS platform serving enterprise clients
- Architected multi-tier caching system (in-memory Map + AsyncStorage) reducing redundant API calls and improving screen load performance across 5+ modules
- Implemented OTP-based authentication via Cloud Run mailer service and deep linking for shared task URLs, improving user onboarding flow
- Delivered 4+ production features in React Native, reducing app crash rate by ~30% through proactive bug fixes and code refactoring
- Collaborated with cross-functional team of 5 (PM, design, backend) in Agile sprints to consistently ship features on schedule

Vimovi Global Tech Pvt Ltd. | Mobile App Developer - Intern

Aug 2025 – Nov 2025

- Built Vimovi's flagship SaaS mobile app from scratch — delivered a fully functional MVP in 3 months as the solo React Native developer
- Architected core app structure from ground up: navigation setup, Firebase integration, REST API connections, and modular folder structure with clean separation of concerns
- Integrated 3 REST API modules and implemented key screens (HomeScreen, TasksAssigned, OverdueTasks) with skeleton UI patterns and lazy loading
- Achieved 0 critical bugs in owned modules across 2 sprint cycles through systematic testing and peer code reviews

PROJECTS

DevSocial – Developers Social Platform | React Native CLI, Zustand, Firebase, Groq Api

- Architected and shipped a full-stack developer social platform to Google Play closed beta as sole developer — covering real-time messaging, multi-image posts, trending hashtags, and streak systems
- Integrated Groq API-powered AI chatbot with AsyncStorage persistence and AI content moderation pipeline, improving user experience and reducing harmful content in live beta
- Engineered scalable Firestore security rules, follow/unfollow with batch writes, and username picker with HashMap caching managed complete Play Console submission including SHA-1 signing and CSAE policy compliance

Expensr – AI Expense Tracker | React Native CLI, TypeScript, Firebase

[Link](#)

- Developed an AI-powered Expense Tracker using React Native, TypeScript, Firebase, and SMS transaction parsing, enabling automatic expense detection from bank transaction messages and real-time financial tracking.
- Implemented AI-driven expense categorization, budget management, and personalized spending insights by analyzing user-entered and SMS-derived transaction data.
- Built a scalable mobile application with Firebase Authentication, Firestore, Google Sign-In, SMS Reader integration, and Google Play Integrity API, ensuring secure, reliable, and production-ready financial data management.

Personal Portfolio | React.js, Tailwind CSS, Framer Motion, VanillaTilt.js, JavaScript

[Link](#)

- Designed and developed a professional portfolio website using React.js, Vite, and custom CSS, featuring a content-first UI, embedded project demo previews, and fully responsive layouts across devices.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Dart

Web/Mobile Development: React, React Native, Redux, Zustand, Flutter, GetX, Node.js, APIs

Databases/Infrastructure: Firebase, Redis, Docker, Kubernetes, AWS, Google Cloud Platform, Stripe

ACHIVEMENTS & CERTIFICATIONS

[Link](#)

- Earned early promotion from Intern to Full-Time Developer at Vimovi Global Tech in just 3 months.
- Developed a Taxi Price Prediction web app within 24 hours at College IT Hackathon 2025.
